

earth-line

LED lighting for the professional

LED leasing program

See the world in a whole new light

Reduce your lighting consumption by 60-90% at no additional cost

Most will agree, the economics of LED lighting make sense. **Environmentally friendly**, unparalleled **energy savings** (up to 90%), **long life** (50,000 hrs), **cool operation**, **crisp colors** etc. With 3-year warranties and existing rebates, the time has never been better!

Earth-line SSL, in cooperation with RCAP leasing (division of RBC) can offer **Lease to Own** solutions at very competitive lease rates (5-6% oac)

The cost benefits of LED lighting is obvious but many lack the capital budget to implement. The leasing option allows the project to proceed under the clients **"operating"** budget. Since the lease can be tailored to meet or exceed energy savings, there is no additional cost. The lease term/payments can also be tailored to exceed energy savings, thereby becoming revenue positive immediately. In addition, the client receives a substantial rebate cheque. It's win-win!

Earth-line is a Canadian co. engaged in the design & manufacture of quality LED lighting since 2006

Earth-line SSL lamps are also eligible for very attractive **rebates** from BC Hydro's **PowerSmart** program, **Efficiency Nova Scotia** and more. Our knowledgeable staff is ready to assist you!

11-3516 Main St, Vancouver, BC, V5V 3N3
